

Systems, Processes and Reporting

Capability Statement

Services

- Environmental Management Plans
- Environmental Audits
- Environmental Approvals
- Integrated Management Systems (ISO 14001 standard)
- Scientific peer review
- Independent assessment of behalf of government clients

Litoria Consulting has the ability to consistently deliver a range of high quality environmental plans and systems to enable clients to achieve best practise solutions for their business and exceed industry standards. We have demonstrated experience in the design and delivery of environmental audits and environmental management plans which have helped our clients reduce their environmental impact, achieve corporate social responsibility targets and identify business efficiencies – the cornerstones of sustainability.

Quality assurance is a fundamental aspect of day-to-day practice at Litoria Consulting, with quality management systems in place to ensure accuracy of reporting and consistency within and between reports. All documents are reviewed by multiple personnel, and often in collaboration with external peer review to produce the best possible product for the client. Litoria Consulting staff are trusted peer reviewers with continuing appointment as an independent third-party reviewer for Government clients, supplemented by editorial and reviewer experience for both Australian and international peer-reviewed journals.

Litoria Consulting has in-house GIS and CAD capabilities with dedicated network infrastructure to enable high speed processing of data that allows for efficient and tailored information capture and reporting to meet specific client needs. Software resources including Adobe Creative Suite software provides the flexibility to provide plans, maps, drawings and presentations in a variety of formats to both internal and external clients depending on project needs. All maps and figures are produced to AUSLIG and Geoscience Australia standards. In addition, any samples and testing required are collected, transported and tested in accordance with the relevant standards at a NATA accredited laboratory.
